Revision History

Name	Date	Reason For Changes	Version

1. Introduction

1.1 Purpose

This is a test purpose description for document verification.

1.2 Document Conventions

Term: SRS

Definition: Software Requirements Specification

Term: HITL

Definition: Human-in-the-Loop

1.3 Intended Audience and Reading Suggestions

System designers, QA engineers, and developers.

1.4 Product Scope

Testing the automated document generation features.

1.5 References

N/A

2. Overall Description

2.1 Product Perspective

A standalone system that converts wireframes to standard SRS documents.

2.2 Product Functions

- Parse hand-drawn wireframes using YOLO.
- Review UI elements with Human-in-the-Loop.
- Draft SRS chapters using RAG.
- Export complete IEEE-standard documents.

2.3 User Classes and Characteristics

User: Business Analyst

Characteristics: Reviews and refines specifications.

2.4 Operating Environment

Cross-platform cloud execution via Streamlit Cloud.

2.5 Design and Implementation Constraints

- Strict adherence to IEEE templates.
- Responsive UI layout.

2.6 User Documentation

- External AI APIs are accessible.
- Supabase is configured.

2.7 Assumptions and Dependencies

N/A

3. Functional Requirements

3.1 Upload Wireframe

ID	FR-001
Feature	Upload Wireframe
Actor(s)	Business Analyst
Description	The system shall allow users to upload wireframe mockup files.
Priority	High
Pre-Conditions	- User is on the main workspace page.
Main Flow	1. User clicks upload button. 2. System validates image format. 3. System stores image bytes in session state.
Post-Conditions	- Image is visible in the review preview.
Alternative Flows	Condition: Invalid file format Steps: System shows warning notification. System requests another file.

4. Non-Functional Requirements

ID: NFR-001 | Type: Performance | Metric: Response time

Description: Visual component extraction must execute within 3 seconds.

5. Business Rules

ID: BR-001 | Name: Upload Limit

Description: Files must not exceed 10 megabytes in size.

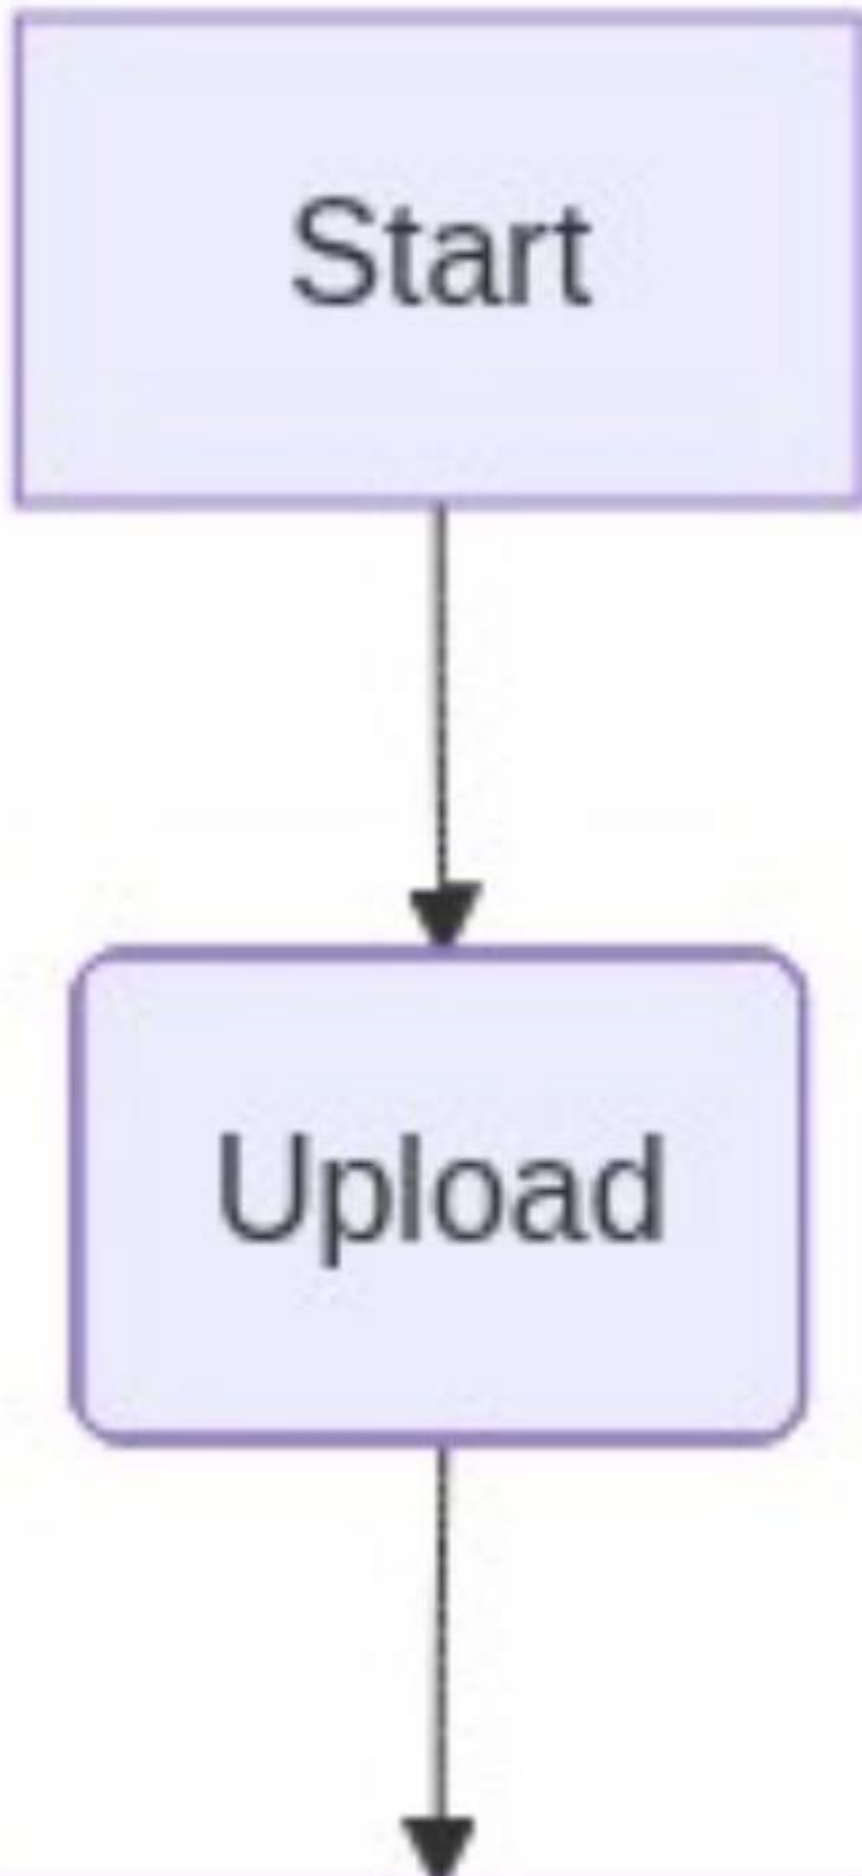

6. Other Requirements

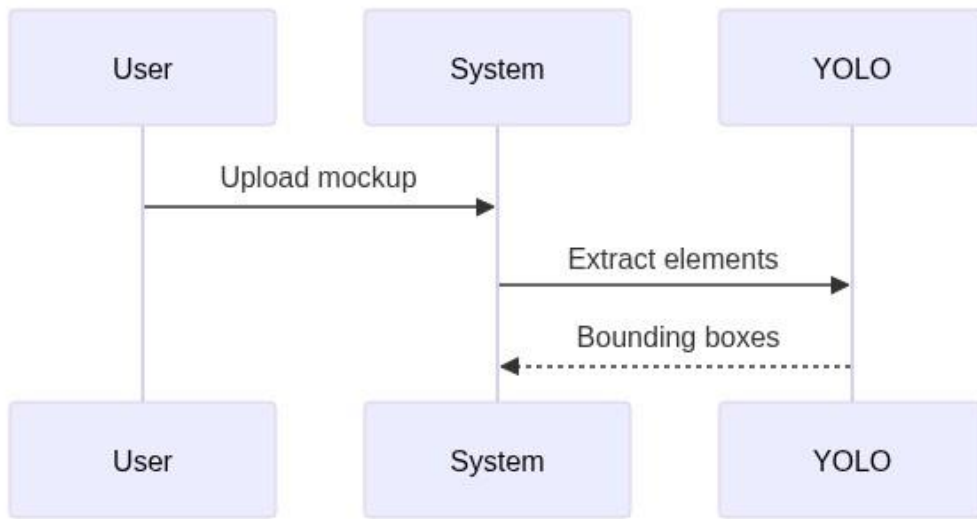

<Define any other requirements not covered elsewhere in the SRS. This might include database requirements, internationalization requirements, legal requirements, reuse objectives for the project, and so on. Add any new sections that are pertinent to the project.>

Appendix A: Glossary

N/A

Appendix B: Analysis Models

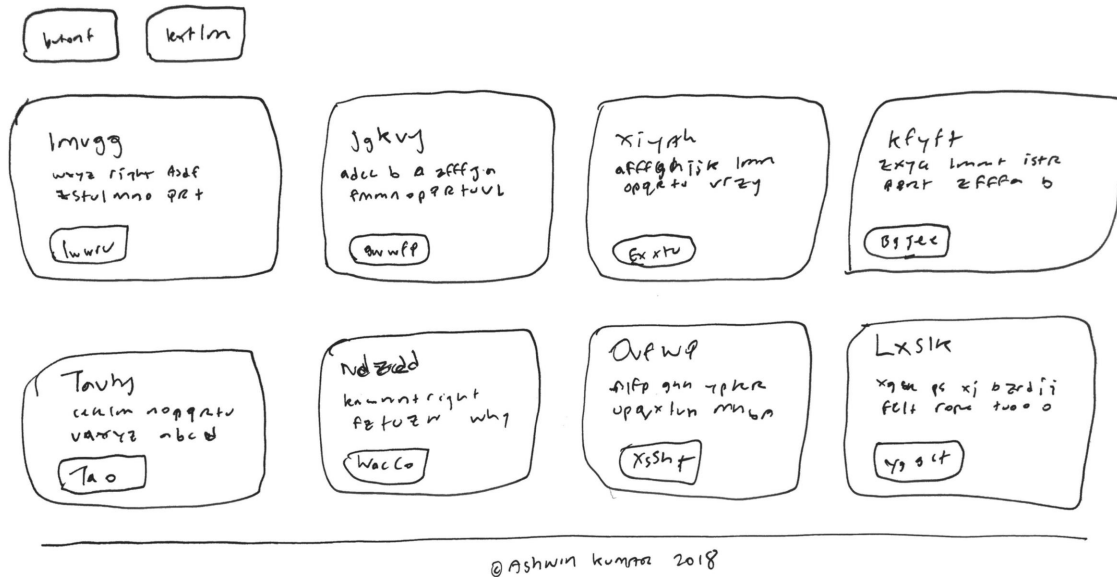

These diagrams represent the data flows during wireframe parsing and verification.

B.3 User Interface Mockup & UI Component Specifications

Mockup Screen Name: Checkout Detail Page Mockup

B.4 UI Component Specification Table

ID	Type	Label	Description
btn_checkout	button	Proceed to Checkout	Primary action button located at the bottom right corner.
input_email	text_input	Email Address	Standard email input field positioned at the top section.
dropdown_shipping	dropdown	Select Shipping Method	List of shipping options available based on user address.

B.5 Detected User Flows

- User enters email address in standard text input.
- User selects preferred shipping method from the shipping dropdown options.
- User clicks 'Proceed to Checkout' to complete the transaction.

Appendix C: To Be Determined List

<Collect a numbered list of the TBD (to be determined) references that remain in the SRS so they can be tracked to closure.>
